

Volunteers Needed for Research Study on Older Women and Informal Caregiving Needs

Gender-Based Violence Among Older Adult Female Caregivers

The study seeks to understand the unmet needs, including risks for gender-based violence, of older adult female informal caregivers in Canada.

You might be eligible if you are:

- 55 years of age or over
- identify as female
- currently or previously provided informal care to someone in your life
- are someone who has observed an older woman in a caregiving role

Participants will:

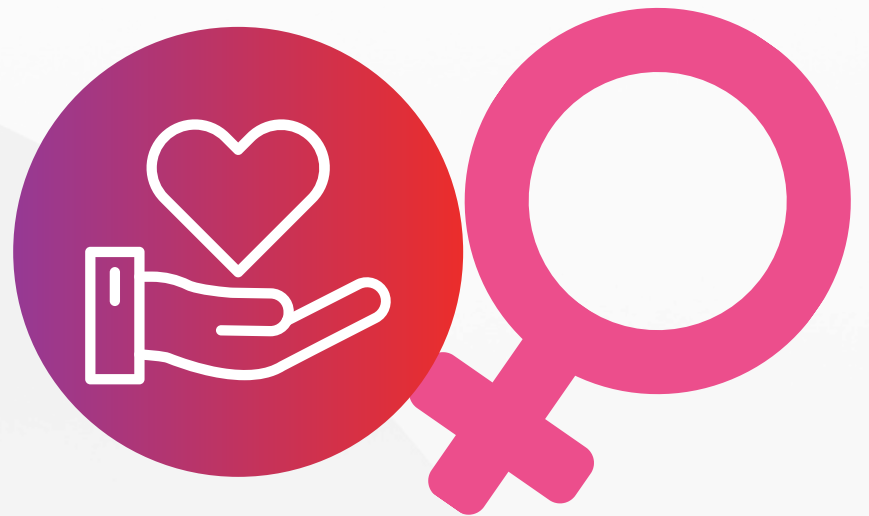

- complete a short online survey
- participate in an optional follow-up interview over Zoom

All information gathered will remain confidential.

For more info: email gh2648@cumc.columbia.edu

Why participate?

Your input will be used to help improve care and support services for caregivers across Canada.
